COMMERICAL CATALOGUE 2026 **CARDIO / STRENGTH**

SPIRIT®

Since its launch in 1983, SPIRIT Fitness has grown into a global leader in fitness equipment, with products installed in high-traffic commercial gyms, corporate wellness centers, rehabilitation clinics, hospitality venues, and residential home gyms worldwide. Over the last four decades, SPIRIT has sold more than 1.5 million pieces of equipment, offering 140 diverse products across 12 categories to 50 countries, earning 55 awards for superior design, innovation, and performance. This tremendous success reflects SPIRIT's unwavering commitment to delivering exceptional quality and customer experiences.

SPIRIT Commercial equipment is engineered for durability, reliability, and high performance, supporting rigorous daily use while minimizing maintenance. The 1000 Series cardio offerings feature advanced user interfaces, interactive consoles, and entertainment options designed to keep members motivated in high-traffic club environments. Complementing this, the 900 and 800 cardio series expand options and provide flexible solutions to incorporate SPIRIT equipment into virtually any commercial environment. In the strength category, SPIRIT's selectorized dual machines and related strength equipment provide safe, efficient, and space-conscious solutions for full-body training, ideal for all commercial fitness spaces. Many SPIRIT machines now feature smart fitness connectivity, including the brand's recent strategic partnership with EGYM, enabling users of the 1000 Series to seamlessly track performance data, access personalized programs, and enjoy fully connected, data-driven workouts across the gym floor.

SPIRIT[®]

In Canada, SPIRIT's corporate operations are based in Niagara Falls, ON, where all products and parts are warehoused and shipped. Bilingual customer service is available five days a week to provide fast, local assistance. Backed by decades of global experience, award-winning innovation, and robust support, SPIRIT Fitness offers dealers and commercial operators a brand known for premium quality, enduring performance, and seamless user experiences. Partnering with SPIRIT Fitness means aligning with a company built on trust, dependability, and a shared commitment to long-term success. Its products and parts have become synonymous with reliability, giving customers confidence that every SPIRIT purchase is backed by a solid warranty and a company dedicated to their satisfaction. Beyond product excellence, SPIRIT also provides strong after-sales support with training resources and digital assets designed to keep both the brand and its partners competitive and confident.

SPIRIT Fitness is a global leader offering premium equipment, extensive parts availability, responsive local service, and a dedicated Team committed to customer success across Canada.

Contact your SPIRIT Fitness representative today to learn more about enhancing our current partnership and how working with a trusted global brand like SPIRIT can help grow your business and strengthen relationships with your customers.

SPIRIT Fitness + EGYM: Elevating Connectivity and Performance on a Global Scale

SPIRIT Fitness has entered into a strategic partnership with EGYM, a world leader in smart fitness and health technology. This collaboration unites two globally recognized brands, each known for quality, innovation, and performance, to deliver a new era of connected training. Together, SPIRIT and EGYM are redefining what it means to track, measure, and improve workouts in real time, empowering clubs and their members with technology that makes training more intelligent, efficient, and rewarding.

Through this partnership, SPIRIT's premium 1000 Series cardio line now features the EGYM Cardio Integration, allowing users to log in effortlessly using RFID* and automatically sync performance data across the entire EGYM ecosystem. Whether running on a SPIRIT treadmill, training on an elliptical, or cycling through an interval session, users gain seamless access to their workout history, personalized metrics, and real-time feedback, all stored and viewable in the EGYM app. This connectivity ensures every session is purposeful and data-driven, motivating members to stay consistent and see measurable results faster.

For gym owners and operators, the benefits extend far beyond user convenience. The integration provides powerful data insights into usage trends, member engagement, and training behaviours, helping facilities make smarter decisions about programming, equipment mix, and member retention strategies. The connected platform also enhances the member experience by creating a consistent digital journey, from onboarding and assessments to tracking progress and celebrating milestones. With intuitive access to performance analytics, operators can personalize training programs, build loyalty, and strengthen the club's value proposition.

For Users

- Seamless Workouts
- RFID Login
- EGYM app access
- SPIRIT 1000 Series cardio + EGYM Intergration

Connected Platform

EGYM

For Clubs & Operators

- Powerful Insights usage trends
- Enhanced member Experience

SPIRIT[®] EGYM

Here's how it works and why it matters:

 **Instant Login:** Members simply tap their RFID device on the console to identify themselves with no manual entry, PINs, or searching through profiles required.

 **Seamless Data Sync:** Once logged in, the equipment automatically connects to the user's EGYM account, syncing workout data such as distance, duration, calories, and heart rate in real time.

 **Personalized Experience:** The machine recognizes the user, loads their personal settings and goals, and ensures that progress is tracked continuously across multiple pieces of equipment.

 **Operational Efficiency:** For club operators, using RFID devices simplifies member management, reduces setup time, and enhances the perception of a high-tech, user-friendly training environment.

In short, RFID is the bridge between the user and the EGYM ecosystem, enabling seamless connectivity and precise data tracking across the gym floor.

What is RFID?

RFID stands for Radio Frequency Identification. Within the SPIRIT-EGYM integration, RFID is used as a contactless login method that allows gym members to quickly and securely access their training profile. Each user is assigned an RFID-enabled card, wristband, or key tag that communicates wirelessly with the touchscreen console on SPIRIT's 1000 Series cardio equipment.

Bring Your Proposal to Life with SPIRIT 3D Facility Renderings

SPIRIT Fitness is proud to offer an innovative new design service that transforms how you present your fitness proposals. Using advanced 3D rendering technology powered by the Homestyler platform, we can create detailed, photorealistic visuals that showcase proposed facilities exactly as they will appear once complete. Every rendering features the full range of SPIRIT commercial equipment included in your proposal, arranged to scale, professionally staged, and optimized to highlight both function and design.

This service allows you to take your clients' presentations beyond standard layouts. Each rendering is fully customizable, enabling you to modify interior design concepts, lighting, flooring, colour palettes, and fixtures to reflect your client's brand and space requirements. Whether it is a corporate fitness centre, boutique studio, recreation facility, or multi-unit residential gym, we can produce a design that perfectly communicates your client's vision while highlighting the premium quality and innovation behind SPIRIT equipment.

For an even more dynamic presentation, we can also provide immersive video walk-throughs of the proposed space. These interactive visualizations allow clients to virtually tour their future facility, offering a true sense of flow, atmosphere, and functionality. Every project is accompanied by a complete, itemized list of all specified SPIRIT products, simplifying the proposal process and helping you submit bids with accuracy and professionalism.

By integrating SPIRIT's 3D rendering service into your proposal process, you'll gain a powerful competitive advantage. These visuals not only help clients picture their investment with confidence, but they also elevate your presentation and build trust. SPIRIT Fitness is ready to partner with you to design and deliver customized renderings that make your proposals stand out, allow you to win more projects, and showcase SPIRIT Fitness as the brand that brings facility visions to life.

SPIRIT®

A man in a grey t-shirt and black shorts is running on a Spirit treadmill. The treadmill is black with red accents and has the 'SPIRIT' logo on the side. The background is dark with red lighting strips, creating a high-tech gym atmosphere. The treadmill has a large digital display and a control panel.

AB920 AIR BIKE

FEATURES

- Dual action, multi-grip handlebars with textured grip and front foot pegs
- Large cushioned, fully adjustable saddle (10 up/down, 6 fore/aft)
- 5.5" backlit LCD displays time, distance, calories, RPM, speed, watts, and heart rate
- 9 pre-set programs: quick start, 3 interval, 5 target
- Bluetooth connectivity for 3rd party apps
- Bluetooth and 5kHz heart rate receiver compatible
- 27" (68 cm) diameter, 10-blade fan produces infinite levels of air resistance
- Belt drive for reduced maintenance compared to chain drive
- Balanced anti-slip ergonomic pedals with toe cage
- Transport wheels and rear lift bar with dual front/rear levellers
- Max user weight of 350 lb (160 kg)

The **SPIRIT AB920 Air Bike** is engineered for high-intensity training and full-body conditioning, delivering infinite, user-controlled resistance through a 27" (68 cm) 10-blade fan. This robust air bike provides a smoother, quieter ride compared to traditional chain-driven models, perfect for high traffic environments like commercial gyms. Its design prioritizes comfort and adjustability with a large, cushioned saddle offering 10 vertical and 6 fore/aft seat adjustments, accommodating a wide range of users. Key features include dual-action handlebars with textured grip, Bluetooth and 5kHz connectivity for heart rate monitors and anti-slip ergonomic pedals, ensuring a safe and effective workout. It also includes a 5.5" backlit LCD display showing real-time workout data, 9 pre-set programs, and an integrated device holder. The AB920 is a versatile addition to any fitness space and an ideal choice for dealers and gym owners looking to enhance their equipment offerings.

CE800 ELLIPTICAL

FEATURES

- 30 lb (14 kg) flywheel; 40 magnetic resistance levels
- Dual-rail system with 20" (50 cm) stride
- Oversized, cushioned pedals with 2° inversion
- White multi-window LED console with comprehensive feedback
- 11 programs: manual, hill, fat burn, cardio, HIIT, interval, constant power, custom, 2 heart rate, fitness test
- Hand pulse sensors and wireless heart rate receiver compatible (Bluetooth & 5kHz)
- Self-generating power system
- USB charging, Bluetooth FTMS, C-Safe port power/comm, cooling fan, reading rack, transport wheels
- Max user weight: 450 lb (204 kg)

The **SPIRIT CE800 Elliptical** is built for commercial reliability, featuring a 30 lb (14 kg) flywheel and 40 levels of magnetic resistance. It operates with self-generating power, eliminating the need for electrical outlets and reducing operational costs, while its dual-rail system and oversized, cushioned pedals with 2° inversion ensure smooth, natural movement. The white multi-window LED console provides feedback on calories, distance, level, METs, program, pulse, RPM, speed, and watts. With 11 built-in programs, allow users to tailor their sessions for endurance, fat-burning and interval training. Hand pulse sensors, and wireless 5kHz and Bluetooth heart rate compatibility further enhance training feedback. Backed by a lifetime frame warranty, the CE800 is a versatile elliptical for all users.

CE850 ELLIPTICAL

FEATURES

- 30 lb (14 kg) flywheel; 20 magnetic resistance levels
- Adjustable stride: 18"-24" (46-61 cm) in 0.5" (1.3 cm) increments
- Dual-rail system; multi-position grips with integrated stride and resistance controls
- Oversized, cushioned pedals with 2° inversion
- White multi-window LED console with full feedback
- 10 programs: manual, hill, fat burn, cardio, HIIT, interval, custom, 2 heart rate, fitness test
- Hand pulse sensors and wireless heart rate receiver compatible (Bluetooth & 5kHz)
- USB charging, Bluetooth FTMS, C-Safe port power/comm, cooling fan, reading rack, transport wheels
- Max user weight: 450 lb (204 kg)

The **SPIRIT CE850 Elliptical** is engineered for demanding commercial use, equipped with a 30 lb (14 kg) flywheel and 20 levels of magnetic resistance for smooth, consistent performance. Its power-adjustable stride (18"-24" / 46-61 cm) and multi-position handlebars with integrated stride and resistance controls offer customized comfort for a wide range of users. Oversized, cushioned pedals with a 2° inversion reduce joint stress and enhance alignment, while the dual rail system delivers added stability and durability. The white multi-window LED console displays key performance data including calories, distance, level, METs, program, pulse, RPM, speed, stride, and watts. With 10 built-in programs, hand pulse sensors, wireless 5kHz and Bluetooth heart rate compatibility, and a lifetime frame warranty, the CE850 is a reliable, high-performance solution for any facility.

CIC850 INDOOR CYCLE

FEATURES

- 37 lb (17 kg) perimeter-weighted flywheel
- Feedback: distance, speed, RPM, pulse, watts, calories, Bluetooth, low battery
- 1-100 levels of magnetic resistance
- Heavy-duty three-piece crank and Hutchinson poly-V belt
- Fully adjustable racing saddle – up/down 22 positions, fore/aft
- Multi-position handlebars – up/down 14 positions, fore/aft
- Bluetooth-enabled LCD console with FTMS and heart rate monitoring
- Integrated tablet holder, dual water bottle holders, dual dumbbell storage
- SPD-compatible toe cages with a 6.9" (17.6 cm) Q factor
- Max user weight: 350 lb (160 kg)

The **SPIRIT CIC850 Indoor Cycle** is engineered for high-performance and versatility in commercial settings. It features a 37 lb (17 kg) perimeter-weighted flywheel and 1–100 levels of wireless rotary magnetic resistance for smooth, precise intensity control. A heavy-duty three-piece crank and Hutchinson poly-V belt ensure quiet, low-maintenance operation. The racing-style saddle and multi-position handlebars offer full fore/aft/up/down adjustability for an ergonomic fit and maximum performance. A Bluetooth-enabled LCD console with FTMS pairs with third-party fitness apps, while the smart resistance knob allows seamless resistance changes. Additional features include an adjustable tablet holder, dual water bottle holders, integrated dumbbell storage, SPD toe cages, a narrow 6.9" (17.6 cm) Q factor, and Bluetooth heart rate monitor compatibility. The CIC850 blends smart tech, comfort, and durability ideal for modern training environments.

CRS800S RECUMBENT STEPPER

FEATURES

- Step-through frame design
- 1"-12.5" (2.5-31.7 cm) adjustable linear step range
- 360° swivel high density foam seat with 18 fore/aft adjustment and 6 recline positions
- 16 lb (7 kg) flywheel and 20 levels of magnetic resistance (5-750 watt range)
- Oversized, cushioned pedals with adjustable straps
- Large display screen
- 10 programs: manual, hill, fat burn, cardio, strength, interval, 2 custom, 2 heart rate
- Multi-grip adjustable length handles and retractable armrests
- Integrated fan and USB charging port
- Hand pulse sensors for heart rate monitoring (5kHz and Bluetooth)
- Max user weight: 450 lb (204 kg)

The **SPIRIT CRS800S Recumbent Stepper** provides total-body, low-impact exercise for users of all fitness levels and abilities. A step-through frame, 360° swivel seat, and retractable armrests ensure easy access. The self-adjusting step range spans 1"-12.5" (2.5-31.7 cm) with speeds from 10 to 210 steps per minute, ideal for rehab or high-intensity use. Oversized pedals with adjustable straps, multi-grip handles, and a high-density foam seat with 18 fore/aft and 6 recline positions ensure comfort and support. With 20 levels of magnetic resistance, users can fine-tune their intensity. The console includes a large, easy-to-read display, 8 pre-set and 2 custom programs, an integrated fan, and USB charging. Built for comfort and accessibility, CRS800S features an ergonomic design and user-friendly seat adjustments that deliver a durable and inclusive solution for wide range of users

CSC880 STAIRCLIMBER

FEATURES

- Durable steel frame with ABS-lined steps
- 7 steps: 18" x 11" x 7" (45 x 28 x 18 cm)
- EMS magnetic control wheel with chain and poly-V belt drive
- 20 levels of magnetic resistance; 25–157 steps per minute
- Multi-window LED console
- 10 programs: rolling hills, fat burn, warm up, training, challenge, interval, target - time/vertical/calories, custom
- Hand pulse sensors, resistance controls, start/stop/pause on handlebars
- Built-in fan, accessory rack, and transport wheels
- Minimum 9' (2.7 m) ceiling height required
- Max user weight: 330 lb (150 kg)

The **SPIRIT CSC880 StairClimber** is built for light commercial use, offering a durable design and user-centric features that enhance both performance and comfort. It includes seven ABS-lined steps, each measuring 18" x 11" x 7" (45 x 28 x 18 cm), driven by an EMS magnetic control wheel for smooth, quiet, and low-maintenance operation. With 20 resistance levels and speeds ranging from 25 to 157 steps per minute, it supports a broad spectrum of fitness levels and training goals. The LED display delivers real-time feedback on key metrics such as watts, METs, vertical distance, and more. The CSC880 is equipped with 10 built-in programs, grip-coated handrails, hand pulse sensors for heart rate tracking, an emergency stop, fan, accessory rack and transport wheels. It's also backed by a 10-year frame warranty, making the CSC880 a powerful and reliable stair climbing solution for any facility.

FUNCTIONAL TRAINER ***CSF-FUNT***

FEATURES

- Dual 200 lb (91 kg) enclosed weight stacks with 10 lb (4.5 kg) increments, featuring a 2:1 pulley ratio
- 83" of cable travel accommodates a wide range of exercises and user heights
- EXERFLEX PRO cables with 2,000 lb (907 kg) breaking strength
- Wide base, multiple pull-up grips, and 16 pulley height adjustments
- Accessories included : revolving long bar, revolving short bar, single grip handles (2), tricep rope, ankle strap
- Max user weight: 400 lb (182 kg)

The **SPIRIT Functional Trainer** is a compact, high-performance solution designed for commercial environments. Built on a heavy-gauge steel frame, it offers lasting durability and smooth operation across a wide range of functional and strength movements. Dual 200 lb (91 kg) weight stacks with a 2:1 pulley ratio allows precise resistance adjustments in 10 lb (4.5 kg) increments using secure magnetic pins.

Fully enclosed stacks enhance user safety, while extended cable travel and multiple pull-up grip positions accommodate users of various heights and fitness levels. Clear workout diagrams on each shroud offer guidance, and quick trigger-style pulley height adjustments ensure fast transitions between exercises.

The open, wide-based design provides space for a bench or stability ball to increase training variety. With premium accessories and intuitive functionality, the unit delivers versatility, convenience, and lasting performance ideal for corporate fitness centres, hotel gyms, schools, and community recreation spaces.

SPIRIT®

HALF RACK ***CSF-HRAC***

FEATURES

- 650 lb (294 kg) dual safety catch weight capacity
- 17 height adjustments for J-Hook bar holders and safety stop placement
- Includes band pegs, pull-up grips, 2 barbell storage slots, and 8 storage horns
- Heavy-gauge steel frame with high-quality powder coat finish
- Wide base and reinforced frame provide superior stability

The **SPIRIT Half Rack** delivers versatility, safety, and performance for athletes of all levels. Designed for a wide range of lifts, it features J-Hook style bar holders and adjustable safety stops for added confidence during workouts.

Enhance training variety with standard band pegs, multiple pull-up grips, and a 650 lb (294 kg) dual safety catch capacity, ensuring users stay challenged and engaged. Eight storage horns keep weights organized and off the floor, maintaining a clean and efficient space.

Built from heavy-gauge steel with commercial-grade components and a high-quality powder coat finish, the CSF-HRAC Half Rack is engineered for durability and long-term performance. The wide base and reinforced frame provide superior stability, while the high-load capacity makes it suitable for serious strength training.

SMITH MACHINE ***CSF-SMTH***

FEATURES

- 11 lb (5 kg) counterbalanced bar for low resistance start
- 550 lb (250 kg) bar loading capacity, 275 lb (125 kg) Per side
- 12 adjustable bar stops in easy-to-identify increments
- 6 weight storage horns and non-slip rubber feet
- Heavy-gauge steel frame with durable powder coating

Elevate strength training with the **SPIRIT Smith Machine**, designed for safe and effective workouts. Engineered with a streamlined setup, it supports a wide range of lifts including squats, bench presses, and shoulder shrugs making it a versatile centerpiece for any training facility.

Built for all fitness levels, the counterbalanced bar starts at 11 lb (5 kg), providing a low starting resistance. Adjustable bar stops ensure safety with small, easy-to-identify increments, giving users confidence in every lift. With a 550 lb (249.5 kg) weight capacity, this machine challenges athletes at any level.

Additional features include six storage horns for organized weight storage and non-slip rubber feet for enhanced stability and floor protection. Built from heavy-gauge steel and finished with a durable, high-quality powder coat, the CSF-SMTH Smith Machine ensures long-lasting performance and resistance to wear in any training environment.

SPIRIT[®]

ADJUSTABLE BENCH **CSF-ADJB**

FEATURES

- Adjustable back pad (0°,15°,45°,60°,75°,90°)
- 4 seat angles (0°,15°,40°,60°)
- High-density foam seat/back pads with reinforced stitching
- Heavy-gauge steel frame with commercial-grade components
- Built-in transport wheels and comfort grip handle for easy moving
- Weight capacity: 617 lb (280 kg)* User plus lifting weight

The **SPIRIT Adjustable Bench** delivers versatility, comfort, and durability making it essential for any strength training space. The back pad adjusts from 0° to 90°, with spring-loaded lock pins for quick, secure angle changes. Four-seat positions offer added stability and support for proper form across a variety of exercises. Built to perform in high-use environments, it features contoured high-density foam pads, premium upholstery, and reinforced stitching for long-lasting comfort and easy maintenance.

A heavy-gauge steel frame and commercial-grade components ensure durability, while built-in transport wheels and a comfort grip handle provide effortless mobility. PVC foot covers protect floors and enhance stability. The CSF-ADJB is engineered to handle the demands of light commercial settings with reliable performance and user-friendly adjustability.

- 200 lb (91 kg) weight stack
- Premium strength cables
- Large storage tray at top of tower
- Integrated rep counter and time display
- Max user weight 360 lb (163 kg)

The **SPIRIT Lat Pulldown and Seated Row** machine combines the two most popular back exercises into one modern design. The traditional Lat Pulldown bar can be adjusted to the user's preferred height. While in the Seated Row position, foot bars aid with stabilization and storage hooks secure the pulldown bar when not in use. An integrated rep counter keeps users motivated and built-in storage on the top cap makes storing accessories away easy.

Weight Stack	225 lb (102 kg) Weight Stack <ul style="list-style-type: none"> 15 lb (7 kg) x 2 Top Plate 15 lb (7 kg) x 13 Plates 5 lb (2 kg) Increment Weight
Performance	Pully Ratio : 0.7 x Weight Inner, 0.5 x Weight Curl
Product Weight	625 lb (283 kg)
Max User Weight	360 lb (163 kg)

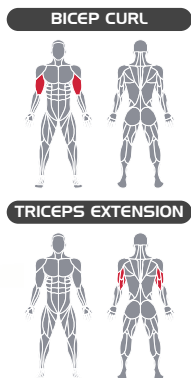

Chest Press / Shoulder Press

CSD-CPSP

Product Dimension	53"L x 78"W x 66"H (135L x 198W x 168H cm)
Weight Stack	200 lb (91 kg) Weight Stack <ul style="list-style-type: none"> 10 lb (5 kg) Top Plate 10 lb (5 kg) x 4 Plates 15 lb (7 kg) x 10 Plates 5 lb (2 kg) Increment Weight
Performance	Pully Ratio : 1.4 x Weight
Product Weight	598 lb (271 kg)
Max User Weight	360 lb (163 kg)

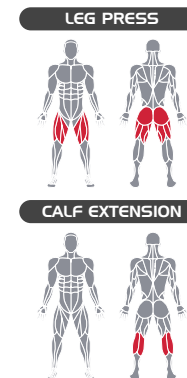

SPIRIT®

Biceps Curl / Triceps Extension

CSD-BCTE

Product Dimension	44"L x 52"W x 62"H (112L x 131W x 158H cm)
Weight Stack	180 lb (82 kg) Weight Stack <ul style="list-style-type: none"> • 15 lb (7 kg) Top Plate • 15 lb (7 kg) x 11 Plates 5 lb (2 kg) Increment Weight
Performance	Pully Ratio : 0.5 x Weight Curl, 0.7 x Weight Bicep
Product Weight	465 lb (210 kg)
Max User Weight	360 lb (163 kg)

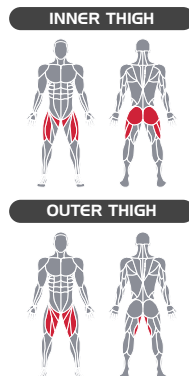

Leg Press / Calf Extension

CSD-LPCE

Product Dimension	76"L x 45"W x 62"H (193L x 114W x 157H cm)
Weight Stack	220 lb (100 kg) Weight Stack <ul style="list-style-type: none"> • 10 lb (5 kg) Top Plate • 15 lb (7 kg) x 14 Plates 5 lb (2 kg) Increment Weight
Performance	Pully Ratio : 1.2 x Weight
Product Weight	585 lb (265 kg)
Max User Weight	360 lb (163 kg)

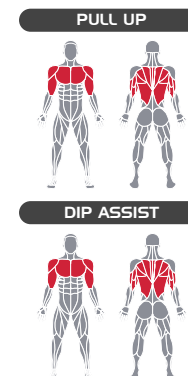

SPIRIT®

Inner / Outer Thighs

CSD-ITOT

Product Dimension	64"L x 27"W x 59"H (162L x 68W x 150H cm)
Weight Stack	170 lb (77 kg) Weight Stack <ul style="list-style-type: none"> • 10 lb (5 kg) Top Plate • 15 lb (7 kg) x 4 Plates • 10 lb (5 kg) x 10 Plates 5 lb (2 kg) Increment Weight
Performance	Pully Ratio : 1.5 x Weight Inner, 1 x Weight Outer
Product Weight	436 lb (198 kg)
Max User Weight	360 lb (163 kg)

Pull Up / Dip Assist

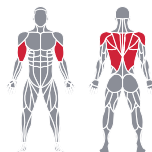

CSD-PUDA

Product Dimension	49"L x 47"W x 88"H (124L x 119W x 224H cm)
Weight Stack	230 lb (104 kg) Weight Stack <ul style="list-style-type: none"> • 10 lb (5 kg) Top Plate • 15 lb (7 kg) x 4 Plates • 10 lb (5 kg) x 10 Plates 5 lb (2 kg) Increment Weight
Performance	Pully Ratio : 1.1 x Weight
Product Weight	583 lb (264 kg)
Max User Weight	360 lb (163 kg)

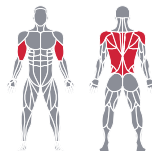

SPIRIT®

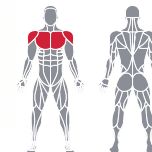

LAT PULLDOWN

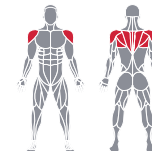

SEATED ROW

PEC FLY

REAR DELT

Lat Pulldown / Seated Row

CSD-LPSR

Product Dimension	71"L x 48"W x 89"H (180L x 122W x 226H cm)
Weight Stack	200 lb (91 kg) Weight Stack <ul style="list-style-type: none"> • 10 lb (5 kg) Top Plate • 15 lb (7 kg) x 6 Plates • 10 lb (5 kg) x 10 Plates 5 lb (2 kg) Increment Weight
Performance	Pully Ratio : 1:1
Product Weight	551 lb (250 kg)
Max User Weight	360 lb (163 kg)

Pec Fly / Rear Delt

CSD-PFRD

Product Dimension	57"L x 58"W x 78"H (145L x 147W x 198H cm)
Weight Stack	200 lb (91 kg) Weight Stack <ul style="list-style-type: none"> • 10 lb (5 kg) Top Plate • 10 lb (5 kg) x 4 Plates • 15 lb (7 kg) x 10 Plates
Performance	Pully Ratio : 0.33 x Weight Per Side
Product Weight	493 lb (223 kg)
Max User Weight	360 lb (163 kg)
